

## Professional Summary

A Data and Consulting Enthusiast and Engineering Graduate with over 8.4 years of management, S/w development, data analysis, business consulting and delivery experience across FS, Telecom, CPG, Healthcare.

- Over 3 years of people management and mentoring, project management experience
- Over 4+ years of advanced analytics experience in highly quantitative and data centric roles in the areas of Risk Modeling, Predictive Modeling, Forecasting, Customer analytics
- Over 4 years of hands-on experience in Business Analytics, machine learning analyzing both qualitative & quantitative data with data visualization and predictive analysis using PYTHON, Alteryx Excel, SQL
- Over 5 years' of hands-on experience in Data Visualization with TABLEAU ,QlikSense and Qlikview

My primary depth areas are Consulting, Analytics, Data Science, Machine Learning, Modern Data Platform, BI and traditional Mission Critical systems.

I've worn many hats in my career--Programmer, Support Engineer, Quality Analyst, Lead and Business Consultant. As a result, I have a unique ability to seamlessly integrate business with technology and navigate through complex challenges.

# Shivendra Upadhyay

## Consultant

## EXPERIENCE

(Nov '15– present)

### Consultant: Data Science & Machine Learning (Management Consulting)

KPMG Global Services:

Have 8.4 year of experience & I lead business initiatives, typically leading analysts across multiple sub-functions in Management Consulting.

- My key focus is on understanding client's Business, Technology and Market requirements and aspirations and then co-formulating **a Data and Insights driven Solution Strategy, while coaching the key stakeholders through the process, resulting in rapid technology adoption in field of BFSI, CPG, Retail, Healthcare, manufacturing domain etc.**
- Fair amount of experience with Consulting, team/stake holder management, resource planning and business process solution with stake holders.
- Have critical experience in project planning, requirement gathering, solution strategy, designing, analysis, RFI, forecasting and project execution/implementation, risk management.
- Have good experience of working **in SDLC, ETL, DWH, Agile, waterfall methodologies and cloud technologies: AWS, GCP etc.** I also help co-develop relevant Solution Architectures with our Partners, who then deliver the projects.
- **Experienced in manipulating and analyzing complex, high-volume, high-dimensionality data from varying sources**
- **Strong understanding and exposure to quantitative analysis/data science in a business context**
- **8+ years of experience in working in multiple domains like Healthcare, Investment Banking, Telecom, Retail, Automotive, Manufacturing etc.**
- **4+ years of extensive hands-on experience in Data Science**
- **3+ years of experience in working in statistical tools like Python.**
- **Good understanding and exposure of Financial Analytics and Predictive modeling using machine learning algorithms to investigate financial fraud detection, and forecasting trading volume**
- **Strong understanding of Linear Algebra, Bayesian Statistics, Stochastic models and multivariate statistics**
- **Good experience in Text Analytics and Natural Language processing for examining and processing acute stroke data in physician notes**
- **Worked on forecasting models on time series data using ARIMA,AR ,MA, also with LSTM.**
- Experience & proficiency in using statistical computer languages & frameworks (Tableau, Python, SQL, Alteryx, Qlikview , Tensorflow ,Scikitlearn

Aspires to pursue a long term career in business strategy, business analytics and consulting.

### Domain

BFSI	■	■	■	■	■
Retail	■	■	■	■	■
ConsumerGood	■	■	■	■	■
Healthcare	■	■	■	■	■
Telecom	■	■	■	■	■

### Tools and Technology

Python	■	■	■	■	■
Alteryx	■	■	■	■	■
Tableau	■	■	■	■	■
Sql/Plsql	■	■	■	■	■
QlikSense	■	■	■	■	■
Qlikview	■	■	■	■	■
Big Data	■	■	■	■	■
Machine Learn.	■	■	■	■	■

### Platforms:

AWS	■	■	■	■	■
MS Azure	■	■	■	■	■

### Competencies, Frameworks and Methodologies

Opportunity Analysis	■	■	■	■	■
Industry Analysis	■	■	■	■	■
Competitive Analysis	■	■	■	■	■

,Keras ,Word2Vec,Pandas ,NumPy,OpenCv,Bokeh,matplotlib,,Git,Spacy ,Gensim ,Spacy,Matplotlib,Beautifulsoup,,Seaborn,AWS EC2, Hive ,Spark ,SVN ,HP QC,JIRA etc.)

- **Have worked on a POC for travel domain wherein data was collected from GPS device and we extracted .kml files and with the help of Alteryx converted the data into tabular format and after applying route optimization transformation the optimal traffic route schedule was presented. Reporting was done on Tableau over AWS cloud.**
- **Have worked on a IoT POC where the live temperature and humidity was captured with the help of Industrial C and data was refreshed in every 5 seconds and respective insights were shared on Tableau again hosted AWS cloud .The idea or solution could be integrated with real time solution devices.**
- Review and validate already existing data models and suggest ideas for improvement, keeping in mind industry benchmarks.
- Have good understanding of statistics & algebra also fair amount of experience in various ML algorithms like SVM, KNN,K-Means ,Logistic Regression ,Random Forest ,PCA ,LDA,Lasso,Ridge, Naive Bayes ,Decision Tree,XGBoost,Neural Network, CNN,RNN,NLP ,NLTK ,text classification ,image classification ,sentiment analysis ,recommender systems etc and their respective applications.
- Data Exploration, data preprocessing, feature engineering, feature selection, model evaluation, correlation, Parameter significance Tests,EDA.
- Have used Hyper-parameter tuning: GridSearchCV etc.
- Resampling techniques: NearMiss, Edited Nearest Neighbor (ENN),Tomek Link Removal, SMOTE, SMOTE + ENN.
- **Have worked to create a document classification model for Audit clients so they can rank and tag the most relevant docs and save the man hours in Auditing the clients .Genism , Doc2vec techniques were used and to classify them Affinity Propagation algorithm was used in Python.**
- **Have worked to develop an account performance scorecard model for a BFSI client to predict the accounts which are on the verge of default via rating them on the basis of their past performance and credit risk scores .XGBoost, Naïve Bayes, Gradient Boosting and sampling methods were used to create the model in python and it was deployed on a Flask framework.**
- **Worked on a Predictive Model for account reconciliations / JE reconciliations using Polynomial Regression, Ridge and Python. The first live machine learning project which has fused data science with finance in Controllershship Org. Potential Benefit .The account recons risk coverage has increased from ~ \$10M to ~ \$50M . Run time JE validation resulting a decrease in recon errors by ~ 60%**
- Data Exploration, data preprocessing, feature engineering, feature selection, model evaluation, correlation, parameter significance Tests, EDA.
- **Have worked in a NLP solution for USA government sub-contractors where we build a model to capture the manual invoices and contract form details. We used word2vec model,Spacy,NLTK,Gensim to classify the expenses to rightful departments and their sub-streams. It saved huge man hours plus reduced errors in processing of info drastically. Python and Tableau were used for data processing and visualization**
- Extensive experience working with cross-functional teams including delivery teams to understand and communicate business problems, define and map solutions and bring out improvements in existing processes

Business case preparation

Financial/Data modeling

Market Research

Pre Sales / Bid management

Business Operations / MIS

## Certifications

Machine Learning Fundamentals

Python with OOPS

Deep Learning

Alteryx Core Designer

## Skills

## + Professional Recognitions / Awards

Q4,2015 : "Pat on the Back" Award, at KPMG

Q1,2014 : "Kudos" ,at NTT Data

- Have worked in pilot project for the biggest UK retail giant to regulate the Soy consumption in their products via various suppliers via coming up with custom business rules and the data was web scrapped via Python and data modelling was done in Alteryx and Key insights were presented in Tableau. Sql server was used for data storage.
- Used Python to automate the Database administration activity for Audit team so they can save time and manual effort also formatted reports were generated as per business requirements for Key stake holders.
- Have worked in healthcare project where KPMG came up with patient cost effective solution via scrapping public healthcare data in US and coming up with interactive dashboards and predicting the patient footfall for hospitals in respective states .Python ,Multivariate Linear Regression and Tableau was used for reporting.**
- Have been part of many POCs in order in field of data science and ETL.
- Good command over database technologies and data modeling like Oracle, sql server, star, snow-flake schema etc.
- Have also used cloud platforms like AWS EC2 and GCP for machine learning and data analysis.
- Substantial experience on visualization & ETL tools like Tableau, Alteryx, QlikSense, Qlikview to provide reports and summary of analysis or findings.

(Nov '13 – Oct '15)

## Senior BI Developer:

NTT Data GDS:

- Have worked in NTT Data, Bangalore as a DB/BI developer for Fidelity DWH project for HR and business activity dashboard reporting framework called Digital Dashboard.
- Perform development of various business metrics via creating periodic dashboards, reports and story points in Tableau to help Fidelity top management take informed decisions in investment business. Have to do data migration, unit testing and performance tuning on SIT, UAT and Dev environment.
- Actively involved in requirement gathering and enhancement process for existing code. Analyze the requirement and work with BA also take part in Data Modelling. Have to resolve production defects need to attend client call and provide on call support to business user.
- Project based on Informatica , Plsql and front end reporting is being done via Tableau .These report give real time aspects with KPIs of business usability and efficiency via which business processes can be enhanced to help enable the clients goal more palpable and to improve productivity in long run via refining the strategic model of a Competitive Intelligence Framework with a view of creating a competitive advantage and go to market strategy for Infosys services and products.

(June '10 – Oct '13)

## Software Engineer

TechMahindra LTD:

- Have had 3.5 years of exp. in TechMahindra, worked in Plsql ,DWH.
- Have worked as an Oracle application developer for 3 years.
- Have both functional and technical knowledge of Sales and Marketing and Order Management. Also have fair experience of leading the team and driving business growth.

Q2,2012 : "Rising Star"  
,TechMahindra Ltd

- Excellent analytical and programming skills, Self-motivated, a quick learner and team player. Extensive knowledge of telecom functioning with very good grip on technical niche.

## EDUCATION

(2005 – 2009)

### Bachelor of Engineering (B.E.)

RCET ,Bhilai ,CG

Major: Computer Science | Percentage: 65.4

(2003 – 2004)

### 12<sup>th</sup> Board (HSC)

BSP HSSR ,Bhilai

CG Board | Percentage: 70.2

(2001 – 2002)

### 10<sup>th</sup> Board (SSC)

BSP HSSR ,Bhilai

CG Board | Percentage: 79.9

## Personal Details

Date of Birth : 17th DEC 1986.

Marital Status: Unmarried.

Passport No : H3875857

Nationality : Indian.

## Personal Hobbies and skills:

Divisional level cricket player also University champion in cricket & basketball.

Creative Editor of college tabloid "EYE".

Scout cadet & awarded best student of the school.

Have won scores of accolades in debate & essay writing competition
